FamilySearch Search Enhancer — Verification Checklist

v0.2.12 · 2026-08-31 · each section is independent — any order, any session

Setup for every check: dock DevTools to the **bottom** (side-docking narrows the page into the third-party-only layout) · filter the console by `FSSE` · the `person ready:` line shows everything that was scraped · **hover** a menu entry to read its tooltip · the search URL appears in the new tab's address bar.

A1 · E&W marriage 1912–2005 — spouse filter ON

Relative needed: married in England/Wales between **1912 and 2005**, marriage date recorded in the tree (couple block shows "Marriage <date>").

- [ ] MARRIAGE entry reads `E&W GRO Marriage Index 1837–2005 — <year>, spouse <Surname>`
- [ ] URL has `f.collectionId=2285732`, `q.marriageLikeDate` = year ±2, `q.spouseSurname` present, **no** `q.marriageLikePlace`
- [ ] The actual marriage appears in the results

Person tested: _____ FSID: _____

A2 · E&W marriage 1837–1911 — GRO index, spouse filter OFF

Relative needed: married in England/Wales between **1837 and 1911**, marriage date in the tree. (Charles's 1831 marriage is pre-1837, so this branch has never been seen live.)

- [ ] Entry label is `E&W GRO Marriage Index 1837–2005 — <year> (<Surname>)`
- [ ] Tooltip ends: *"Spouse filter omitted — this index names spouses only from 1912."*
- [ ] URL has collection `2285732` but **no** `q.spouseSurname`

Person tested: _____ FSID: _____

B · Woman's surname flips at the real marriage year

Relative needed: a woman with a **dated** marriage who appears in censuses **both before and after** that year — ideally one who married **before age 20** (the old age-heuristic would have gotten her wrong).

- [ ] Census entries **before** the marriage year search `q.surname=<maiden>` (hover: tooltip names her with the maiden surname)
- [ ] Census entries **from** the marriage year on search the **married** surname
- [ ] DEATH entries use the married surname
- [ ] *Bonus (2+ dated husbands):* each census uses the latest marriage ≤ that year; one death entry per married surname; one marriage entry per husband, each at its own year

Person tested: _____ FSID: _____

C · Christening / burial proxies

Relative needed: a pre-1837 person with a **Burial but no Death** vital, and/or a **Christening but no Birth** vital (common in that era).

- [ ] `person ready:` shows `deathYear:null` with `burialYear` set (or the birth/christening pair)
- [ ] Tooltips honestly say *"buried YYYY ±2"* / *"christened YYYY ±2"*
- [ ] Census entries are bounded by the proxy years (none after the burial year)
- [ ] Pre-1837 burial → **no** GRO death entry; **Find A Grave only**

Person tested: _____ FSID: _____

D · Remaining ⌛ collection ids (one click each)

Relatives needed: one born/christened in **Scotland 1564–1950**, one born in **Ireland 1620–1881**, one born in the **US 1867–1931**.

- [ ] **Scotland:** "Scotland births & baptisms 1564–1950" opens collection `1771030`; results are sensible Scottish baptisms and the results page shows the collection filter chip ✓ **verified 2026-08-31**
- [ ] **Scotland bonus:** censuses 1841–1901 offered; **1911** falls back to a generic in-country search (no single FS collection)
- [ ] **Ireland:** collection `1584963` — sensible results
- [ ] **Ireland bonus:** only the **1901 and 1911** censuses are offered (the rest were destroyed)
- [ ] **US:** "US births & christenings 1867–1931" opens collection `1808995` — the chip names the collection (zero results can be legitimate: only ~37k records)

Fail signal: an error page, a chip reading "Other, <id>" instead of the collection name, or the filter silently ignored. (E&W `1473014` + Scotland `1771030`: click-verified 2026-08-31; the dead US id `1675234` was caught by this very check and fixed to `1808995`.)

People tested: _____ _____

E · US / Canada regional logic

Relatives needed: someone born or died in **New York state**; if available, someone from **Alberta / Saskatchewan / Manitoba**.

- [ ] **NY:** state censuses `1855 / 1865 / 1875 / 1892 / 1905 / 1915 / 1925` interleaved with the federal ones
- [ ] **NY: 1890 never offered** (destroyed census)
- [ ] **NY:** DEATH group = **Find A Grave only** (no US civil index)
- [ ] **Prairie Canada:** `1906 / 1916 / 1926` censuses offered

Person tested: _____ FSID: _____

F · Quick behavior checks (any person, ~30 s each)

- [ ] Open the Records menu **immediately** after page load, before the Family section renders → the list grows in place (marriage entries appear) without closing
- [ ] Navigate person → person via a family link → old rows/menu vanish; the new person's menu is correct; Shift+click cycle resets
- [ ] **Living** person → no DEATH group
- [ ] Person who **died under 16** → no MARRIAGE group
- [ ] **Australia / NZ** person → no census entries (marriage/death fallbacks only)

- [ ] **All green?** Tell Claude "release pass" → `FSSE.DEBUG = false`, version bump, rebuild the distributable zip.
